Make safety your priority this storm season.

Plug into safety with GenerLink™

offered by LCEC

Many Southwest Florida residents use portable electric generators to power their homes during electrical outages caused by summer storms. While generators are a convenience, if used improperly, they can cause hazardous conditions for the homeowner and for electric utility crews working in the area.

GenerLink™ provides a safe connection from the electric meter directly to the generator.

Purchase your GenerLink™ today. Visit www.lcec.net or call 239-656-2300.

Benefits of GenerLink™:

- Eliminates the use of extension cords
- Easiest and safest generator connection
- Detects generator operation and automatically disconnects from the utility grid
- Connection keeps generator outside where it's safe
- Allows use of any appliance up to the capacity of the generator
- Installed behind the meter by a certified LCEC technician

UNDERSTAND and MANAGE your energy costs!

An LCEC energy analyst can conduct a FREE onsite or virtual energy survey of your home. You can also use LCEC interactive online tools to find ways to conserve and reduce your electric bill.
