

## Safe Generator Connection

Many Southwest Florida residents use portable electric generators to power their homes during electrical outages. While generators are a convenience, if used

improperly, they can cause hazardous conditions for the homeowner and for electric utility crews working in the area.

GenerLink™ offered by LCEC eliminates the use of extension cords and other hazardous connections by providing a safe connection from the electric meter directly to the generator. GenerLink™ also detects when a generator is operating and automatically disconnects from the utility grid, eliminating dangerous backfeed.

### **Benefits of GenerLink™:**

- Allows customers to run virtually any appliances up to capacity of their generator (maximum 15kw)
- Easily installed behind the electric meter (maximum 200 amp service) by a certified LCEC technician
- Comes equipped with a 20', 50 amp connecting cord
- 7 year manufacturer's warranty

\* Generator not included
