

# FACTS TO LIVE BY:

1. Electricity is essential, but can be dangerous.
2. Conserving electricity conserves precious resources (and saves money!).

LCEC is partnering with the Florida Rep to make sure that kids of all ages know how electricity works, how to use it safely and how to conserve.

**Be sure to see ZAP!** at one of the upcoming Lunch Box Theatre productions. This wildly entertaining play will leave you with all the knowledge you need to stay smart, stay safe and stay saving!

Visit [www.floridarep.org](http://www.floridarep.org) for more info.

# WE KNOW THAT YOU **depend on electricity**

One of the ways that utility companies provide safe, reliable service is by trimming vegetation that has grown, or is about to grow, into power lines. LCEC has an annual vegetation maintenance schedule aimed toward avoiding service interruptions caused by tree interference. Pruning is performed by several contract vegetation management companies who have adopted pruning techniques developed by the American National Standards Institute.

Our contractors may be visiting your neighborhood soon because we are committed to continuously improving reliability. Be sure to visit [www.lcec.net/trees/](http://www.lcec.net/trees/) to learn more about the LCEC TREES program.

## **LCEC Approved Vegetation Contractors:**

- Asplundh Tree Expert
- ABC Professional Tree Services
- Lewis Tree Service
