

PROTECT *YOUR* INVESTMENTS

**Lease and purchase
options available!**

LCEC provides utility-grade surge protection for your appliances and expensive electronics. The sensitive microprocessors in your electronics can be damaged by the long-term affects of small power surges. Don't be lulled into a false sense of security with a low-cost, plug-in power strip. Protect your investment before damage happens.

**For more information or to purchase
surge protection, call 656-2300 or visit

Plug in to safety

Many Southwest Florida residents use portable electric generators to power their homes during electrical outages caused by summer storms. While generators are a convenience, if used improperly, they can cause hazardous conditions for the homeowner and for electric utility crews working in the area.

GenerLink™ provides a safe connection from the electric meter directly to the generator.

Benefits of GenerLink™:

- Easiest and safest generator connection
- Eliminates the use of extension cords
- Detects when a generator is operating and automatically disconnects from the utility grid, eliminating dangerous backfeed
- Allows customers to run virtually any appliance up to capacity of their generator
- Installed behind the electric meter by a certified LCEC technician
- Connection at the meter keeps your portable generator outside where it's safe
