

Due to global supply chain issues and Hurricane Ian, new service requests may be delayed. Disruptions in raw materials and equipment supplies are currently impacting the ability to provide some services. As a result of Hurricane Ian, a backlog for new service connections may cause longer than usual scheduling delays.

Impacted customers will be notified if their service request will be delayed.

Suppliers are unable to provide exact delivery dates for inventory and LCEC will not have the ability to predict when inventory levels will reach normal levels. Supply chain challenges are expected to extend through 2023. New construction delays of 4 to 6 weeks are expected to last through January of 2023.

Please understand, LCEC is working to provide service in the most efficient manner possible and will construct facilities in the order requests are received, as equipment becomes available. Thank you in advance for your patience.
